

JACOBI Karl

(-)

(DE)

Addendum

Co-inventor SCHANDLER ¹

Charles SCHANDLER's curriculum suggests that he was not technically accomplished and that he was only a co-owner of the patent, not a co-inventor of the process patented in 1898 in Luxembourg, France and UK (invention N° 1)

JACOBI was a "boiler maker" in Roth an der Our and was most likely the true inventor of the process.
